The Climate Corp
San Francisco, CA

October 23, 2017

Dear Hiring Manager,

I am a junior in Computer Science at the University of Michigan, and I believe I could be a great asset for both the Mobile and the Back-end/Platform Services teams.

I have experience working with Android from a large project I completed last year, in which I made a system that automatically collects student attendance data using smartphones. Our data was persisted in a Cassandra cluster, and went through a REST API powered by Java Servlets.

I also have strong experience in Java from my education and several other smaller projects, as well as experience with functional programming through Haskell.

The work at The Climate Corp is very interesting to me, and I would love an opportunity to discuss it further. Please review my resume for additional details regarding my experience and relevant skills.

Thank you,

Paul Gossman
