## Upstart

San Carlos, CA

October 14, 2017

Hello,

I am a junior in Computer Science at the University of Michigan, and I am highly interested in working at Upstart next summer.

I would be a great asset for the team at Upstart, because in addition to my excellent communication and problem-solving skills, I also have 12 months of previous work experience in building production applications using Laravel, an MVC framework very similar to Rails. Through personal projects and academic research, I also have experience with JavaScript frameworks NodeJS, Meteor, React Native, and the jQuery library.

Upwork's innovative lending platform and enormous growth is very exciting, and I would love to be a part of the team. Please review my resume for any additional details regarding my experience and relevant skills. I look forward to hearing from you.

Thank you,

**Paul Gossman**
