Splunk
San Francisco, CA

October 23, 2017

Dear Hiring Manager,

I am a junior in Computer Science at the University of Michigan, and after reading about the open internship position, I believe I would be a great asset for the team at Splunk next summer.

I am a highly motivated individual and have taken on several significant coding projects, both individually and in a team. I have created multiple JavaScript projects which include the use of NodeJS, React Native, and Meteor frameworks. I have strong experience with C++ gained through several personal projects and my education. Other projects I have worked on have given me exposure to Python, Java, MVC web frameworks, and even Big Data technologies such as Apache Cassandra.

The work at Splunk is very interesting to me, and I would love an opportunity to discuss it further. Please review my resume for additional details regarding my experience and relevant skills.

Thank you,

Paul Gossman
