Nuro
Mountain View, CA

October 13, 2017

Hello,

I am a junior in Computer Science at the University of Michigan, and I am highly interested in working at Nuro next summer.

I believe I will be a great asset for the team at Nuro, for I have very strong background and skillset that includes C++, Cassandra and NoSQL data modeling, test-driven development, and developing production software systems. Just recently, I started working on a research project in which we are researching how to augment a robot's AI using crowdsourcing, allowing it to interact with unfamiliar objects for which it has no training data. By the time I would come to Nuro for an internship in the summer, I will have had several months of research experience on this project.

Please review my resume for any additional details regarding my experience and relevant skills. I look forward to hearing from you.

Thank you,

Paul Gossman
