Course Hero
Redwood City, CA

October 23, 2017

Dear Hiring Manager,

I am a junior in Computer Science at the University of Michigan, and after reading about the open internship position, I believe I would be a great asset for the team at Course Hero next summer.

I have one year of previous work experience as a developer building web apps in Laravel, an MVC PHP framework based on Symfony. In that position, I also wrote several dozens SQL queries and designed relational database schema.

In addition to my work experience, I also have several personal projects. One of them was a large-scale research project last year, where I built a highly-scalable system to automatically collect attendance data using smartphones and provide reports and data analysis. In this project, I gained exposure to Android development, NoSQL databases, and REST API design.

The work at Course Hero is very interesting to me, and I would love an opportunity to discuss it further. Please review my resume for additional details regarding my experience and relevant skills.

Thank you,

Paul Gossman
