**6sense**  
San Francisco, CA

October 23, 2017

Dear Hiring Manager,

I am a junior in Computer Science at the University of Michigan, and I believe I would be a great asset for the team at 6sense due to my strong experience in Linux, Java, and SQL.

I have formal training and possess multiple certifications in Linux. I have been using Linux on desktops and servers daily since 2013, and in that experience I have gained much exposure and familiarity with the system.

I also have very strong Java skills. My Java experience ranges from several CLI applications, to using Servlets to build web applications, and using Java for large Android projects. I also have a love for the study of design and best practices in Java and OOP.

In my past work experience developing web applications, I designed relational database schema and wrote several dozen SQL queries.

The work at 6sense is very interesting, and I would love an opportunity to discuss further. Please review my resume for additional details regarding my experience and relevant skills.

Thank you,

**Paul Gossman**
