Fitbit
San Francisco, CA

October 17, 2017

Dear Hiring Manager,

I am a junior in Computer Science at the University of Michigan, and I am highly interested in working with the Backend Engineering team at Fitbit next summer.

After reading the desired qualifications, I believe I would be a great asset for the team. Last year, I worked directly with a professor who specialized in Cassandra data modeling to develop a highly scalable system to collect student attendance data using Cassandra and an Android application I made. In addition, I also have work experience in which I designed multiple relational database schemas and created applications using MVC frameworks. More generally, I am also a very hardworking individual with excellent problem-solving and communication skills.

Please review my resume for any additional details regarding my experience and relevant skills.

Thank you,

Paul Gossman
