Dear Hiring Manager,

I am a junior in Computer Science at the University of Michigan, and after reading your desired qualifications, I believe I would be a great asset for the team.

In addition to several personal projects ranging from web to mobile, I also have one year of prior work experience in which I led the development of multiple applications using Laravel, an MVC web framework very similar to Rails. In one of my personal projects, I worked with a team in developing a mobile application using React Native with a NodeJS and MongoDB backend (more info an app at <https://devpost.com/software/pool-7wivp4>). More generally, I am also a very hardworking and motivated individual with excellent problem-solving and communication skills.

Please review my resume for additional details regarding my experience and relevant skills.

Thank you,

Paul Gossman
