Jump Trading   October 12, 2017
Chicago, IL

Hello,

I am a junior in Computer Science at the University of Michigan, and I am highly interested in working at Jump Trading next summer through the internship program.

I believe I will be a great asset for the team at Jump as an intern, for I have very strong skillset that includes C++, networking, Linux systems, and quick problem-solving. I've learned these skills through my education, many personal projects, and real-world work experience in a developer position. In my developer position, I led the design, development, and rollout of a production application used across many departments of the organization.

Please review my resume for any additional details regarding my experience and relevant skills. I look forward to hearing from you.

Thank you,

Paul Gossman
