Palo Alto Networks   October 15, 2017
Santa Clara, CA

Hello,

I am a junior in Computer Science at the University of Michigan, and I am highly interested in working at Palo Alto Networks next summer.

I believe I would be a great asset for your team. I have strong Java programming skills, knowledge of object-oriented design principles, a well-read copy of Joshua Bloch's Effective Java, experience creating my own REST APIs that consume and produce JSON, and formal training in networks and network security. More generally, I am also a very hardworking individual with excellent problem-solving and communication skills.

Palo Alto Networks' technology is highly interesting, and I would love to schedule an interview to discuss the internship further. Please review my resume for any additional details regarding my experience and relevant skills. I look forward to hearing from you.

Thank you,

Paul Gossman
