Whitepages   October 23, 2017
Seattle, WA

Dear Hiring Manager,

I am a junior in Computer Science at the University of Michigan, and I believe I could be a great asset for the teams at Whitepages.

I have experience doing mobile development in React Native. Last month, I worked on a team to develop a social networking app in React Native (`https://devpost.com/software/pool-7wivp4`). I also have work experience developing web applications in Laravel, an MVC framework similar to Rails.

Through my own self study, I have also been learning and practicing Haskell. This exposure to functional programming has influenced my programming in other languages such as Java and Python.

The work at Whitepages seems very interesting to me, and I would love an opportunity to discuss it further. Please review my resume for additional details regarding my experience and relevant skills.

Thank you,

Paul Gossman
